Be mindful

**Take control of your
speech**

Put forth conscious effort

Say it like you mean it

Be deliberate

How did Dr. Boone first recognize that INTENT could help people with Parkinson's?

Bonus Reading: Read the passage two times. Use MORE INTENT the 2nd time!

SPEAK OUT! Therapy was developed by Parkinson

Voice Project. The program is based on principles of motor learning and the teachings of the late Daniel R. Boone. In the late 1950s, Boone recognized people with Parkinson's could improve their speech by "speaking with INTENT." He discovered this when

asking patients to count
forward and then
backward. When they
counted backward, they
used more **INTENT.**
