

Hummingbirds

Inspired by Jose from Virginia!

Reading:

**Hummingbirds migrate
individually.**

Some return to the same neighborhood years later.

Some fly at speeds greater than 33 miles per hour.

Initial approach.

Getting closer.

Almost there.

Final approach - braking.

Touchdown!

Conversation Exercise:

What birds do you see in your area?

Name 2-3 places to buy a hummingbird feeder.

Bonus Reading:

Hummingbirds can recall massive amounts of information about their food sources. They can remember the locations and nectar quality of flowers they have visited.
